25X1

1. Approximately 550 engineers and technicians are employed in the oil industry. Equipment, installations, prospecting and exploitation material of Polish manufacture (but of Soviet design) are manufactured by the Machinery and Drilling Equipment Factory (Fabryka Maszyn i Sprzetu Wiertniczego) at Glinik Mariampolski. This factory was established when the Central Workshops of the Oil Industry (Centralne Warsztaty Naftowe) were expanded. Apart from its normal production, the factory assembles machinery and installations imported from the USSR.

2. All the repair work to the equipment is handled by the Krosno Repair Works (Krosnienskie Zaklady Remontowe) at Krosno (R50/Z74), which has now become the repair center of the oil industry. This plant has the following sections: mechanical, electro-mechanical, and repair of motor vehicles. This plant also assembles equipment arriving from the USSR.
